Mosquito Problems Start At Home

- Throw away old bottles and cans
- Clean overgrown ponds and stock with fish
- Clean leaf-clogged gutters
- Fill treeholes
- Throw away or destroy old tires
- Change water in bird baths weekly
- Screen or cover rain barrels
- Repair Leaky Faucets
- Empty water from flower pot dishes

Mosquito Life Cycle

- It takes about one week for a mosquito to grow from egg to adult

DON'T GIVE MOSQUITOES A CHANCE!!

Mosquitoes need water to breed and grow. It doesn't take much water and it doesn't take much time. So, almost anything that will hold water for one week or more can produce these pests. Many places around your home may be causing mosquito problems. Destroy or empty these places and mosquitoes won't have a chance!
